Dr. Gustav J. Martin
Research Laboratories
National Drug Company
4663 Stenton Avenue
Philadelphia 44, Pa.

Dear Dr. Martin:

I have a distinct recollection of the existence by a review by yourself on the acridine dyes, but unfortunately cannot trace the citation. I would be indebted to you for a reprint of it (if you can identify what I am seeking) or if this is not available, the citation for it. We are engaged in some studies of biological effects of acridines (aside from antiseptis), in part with the collaboration of S. Rubbo who is visiting this laboratory for a few months.

I will be pleased to continue and extend exchange of our publications on topics of mutual interest.

Yours sincerely,

Joshua Lederberg
Associate Professor of Genetics
